

## **Director for the Swedish Winter Sports Research Centre**

### **Dept of Health Science, Mid Sweden University**

The centre is equipped with state of the art human exercise physiology and biomechanics research laboratories. This is also where world class skiers of all disciplines are tested. The centre was established 2007 and has currently approx. 8 employees and close connection to education in sport science at the university.

The university has well developed facilities for teaching and research and has during the last two years set up exciting R & D activities with international cooperation projects in a number of sports related areas. The centre is also the R & D unit for the Swedish Olympic Committee and provides physiological/biomechanical support to Olympic athletes.

Position is based in Ostersund and initially will be available for a two year secondment.

The successful candidate will be expected to provide leadership, clear direction and management to support the staff and the Executive team. Set the overall tone of the organisation and provide the focus for the team to deliver its objects ensuring high levels of quality control  
Engage with the University in strategic thinking, planning and leadership and oversee the financial health of the centre.

Candidates will require relevant excellence in Science (PhD in Physiology, Exercise Science, Sports Biomechanics or equivalent)

Please, send curriculum vitae and a statement of research interests to:

Anita Pejler, Head of Department
